## FOR IMMEDIATE RELEASE

### Green Generation Solutions, LLC Announces Amy Boyce as Manager, Solutions

Green Generation Solutions, LLC is pleased to announce that Amy Boyce has joined the firm as Manager, Solutions. Amy has over 12 years of industry experience in project management and optimization of energy systems. As a Manager in the Solutions Group, Amy performs facility audits, conducts financial analysis, and assists in the design and optimization of energy saving solutions on behalf of Green Generation Solutions' clients.

"Amy is a wonderful addition to our staff as Manager, Solutions. She brings a wealth of experience as a mechanical engineer that will immediately strengthen our Solutions Group. This direct experience coupled with her background in ratings systems and portfolio benchmarking will be extremely beneficial to our clients in helping them to meet their energy efficiency goals," said Brad Dockser, CEO.

Prior to joining GreenGen, Amy was Vice President, Sustainability Services for Cassidy Turley, a commercial real estate services firm, where she led sustainability programs focusing on LEED certification, as well as benchmarking properties In ENERGYSTAR® Portfolio Manager. Prior to that, Amy was Manager, in the LEED department for the US Green Building Council where she led the development of the next version of the LEED Rating System for energy-related credits dealing with building performance, renewable energy, and commissioning for new and existing buildings. Amy also worked as a mechanical engineer for SmithGroup, Cannon Design, and EAC, focusing on the design of HVAC systems for new construction, as well as renovations. In these roles, she developed systems to meet LEED criteria, and promoted and utilized innovative technologies for energy savings.

Amy is a licensed Professional Engineer in the Commonwealth of Virginia. She attended The Pennsylvania State University where she received a Bachelor of Science in Mechanical Engineering. She later attended Georgetown University, where she earned a Master of Business Administration. Additionally, Amy is Chair of the Sustainability Committee for the National Capital Chapter of ASHRAE.

#### ABOUT GREEN GENERATION SOLUTIONS, LLC

Green Generation Solutions is an established, growing building performance company that engineers and implements customized energy solutions aimed to improve the profitability of our client's facilities and their operations throughout North and South America and the United Kingdom. We believe that every business can be more profitable by making energy decisions backed by comprehensive analysis, collaborative planning, and ongoing measurement of results. At GreenGen, we offer a wide array of services, including: high efficiency lighting retrofits, HVAC optimization, building commissioning, building envelope assessments, procurement, CHP system development, "smart building" systems, and data analytics.
