FOR IMMEDIATE RELEASE

Green Generation Solutions, LLC Announces Partnership with ENERGY STAR®

Bethesda, Maryland -- Green Generation Solutions today announced a fundamental commitment to protect the environment by becoming an ENERGY STAR Partner. Green Generation Solutions' voluntary partnership with the U.S. Environmental Protection Agency's ENERGY STAR means that we will be working toward helping our clients improve the energy efficiency and performance of their facilities; we believe that an organization-wide energy management approach will help our clients enhance their financial health and aid in preserving the environment for future generations.

"Green Generation Solutions is pleased to team up with the EPA's ENERGY STAR program to help promote its goals while creating a competitive advantage for our clients," says Brad Dockser, Chief Executive Officer.

In partnership with ENERGY STAR, we will help our clients to:

- Measure and track the energy performance of their facilities at all locations.
- Set a goal to improve the energy efficiency of their buildings by 10% or more, in support of the ENERGY STAR Challenge

We will also:

- Encourage our staff and community to learn about the benefits of energy efficiency and to implement appropriate energy efficiency measures
- Encourage other companies with whom we work to join ENERGY STAR and take the ENERGY STAR Challenge

By helping our clients to reduce energy consumption, Green Generation Solutions can save millions of Kwh each year. This will also reduce air pollution by preventing millions of pounds of carbon dioxide from being released into the atmosphere.

ABOUT ENERGY STAR

ENERGY STAR is a voluntary partnership between businesses, government and others united to protect our environment for future generations by changing to energy-efficient practices today. ENERGY STAR works with more than 9,000 partners to improve the energy efficiency of products, homes, buildings and businesses. Businesses can use ENERGY STAR to improve efficiency, enhance profits, and create a competitive advantage. In 2006 alone, ENERGY STAR helped businesses and consumers save more than \$14 billion in energy costs while reducing global warming emissions equivalent to those from 25 million vehicles.

For more information about ENERGY STAR, visit www.energystar.gov or call toll-free 1-888-STAR-YES.
