### **Green Generation Solutions, LLC Names Construction Services and Government Contracting Experts, Adding Depth to Fast Growing Firm**

BETHESDA, MD (September 24, 2015) -- [Green Generation Solutions, LLC](#) (GreenGen), a DC region-based company experienced in engineering and implementing energy efficiency plans in commercial properties, has appointed two new executives: Brad Bolino as senior advisor, Construction Services, and Col. Richard Gonder (Ret.) as director, Government Contracting.

"GreenGen is growing at an exponential rate, reflecting demand for well-executed energy efficiency plans that add value to the bottom line. We are excited to add Brad and Richard to our leadership. They will help us provide exceptional value for our customers and position us for further growth," explained Brad Dockser, CEO, GreenGen.

In this newly created position, Bolino is charged with strengthening GreenGen's project implementation processes and workflow. He advises GreenGen's executive team on processes and procedures, develops project procedures and related forms and documents, and implements recommended procedural changes to establish solid processes to execute GreenGen's projects from design to implementation. "Brad's leadership and depth of experience in building trades and construction services will be invaluable to GreenGen as we continue to expand our business," said Dockser.

Prior to joining GreenGen, Bolino was the founding principal and president of the Mechanical Services Division of The Kirlin Group. He spent 35 years in the building design, construction, and operation and maintenance industry. Bolino is a past president of the Mechanical Contractors Association of Metro Washington, past chairman of the Washington Building Congress, past chairman of the Mechanical Service Contractors of America, chairman of the Independent Contractors Exchange Group Board, and Executive Committee member of Our Lady of Good Counsel High School.

Col. Richard Gonder (Ret.) has joined the firm as Director, Government Contracting, to support GreenGen's growing business with government agencies seeking energy saving solutions under the [GSA Schedule 84 ESPC ENABLE program](#). He will manage government contracts and task orders from pre-award phase to closeout, reviewing and negotiating contracts, modifications, teaming agreements, and subcontracts consistent with GreenGen strategies and in compliance with the FAR.

Prior to joining GreenGen, Gonder spent five years at Femme Comp Inc. (FCI), six years at Siemens, and over 25 years as an Army Signal Corps Officer. While at FCI, Gonder directly supported numerous DOD agencies (OSD, DISA and Army) in Systems Engineering, Program Management, Program and Budget analysis and System Architecture.

While at Siemens, Gonder was responsible for capturing and program managing a major contract with the Army for base communication infrastructure modernization for bases around the world. He later assumed responsibilities for all Infrastructure solutions delivery for Siemens Government Services, adding prime ESPC contracts with DOE and GSA, gate security, and maintenance services with the Army and DOE, as well as GSA Schedule sales and delivery.

Gonder's Army career included numerous leadership positions, providing communications and IT support to major Army, Joint and Combined (with Allied) headquarters in Germany, Korea, and Belgium. His nominative staff assignments included the Defense Communications Agency, the Joint Chiefs of Staff, the National Reconnaissance Office, and the Army Staff. He deployed communications support to UN Peacekeeping operations in former Yugoslavia as well as Operation Support Hope – refugee relief operations in and around Rwanda. Gonder has a B.S. in Engineering from the U.S. Military Academy; an M.S. Electrical Engineering, AF Institute of Technology and an M.A. (equiv.) in National Security Strategy, US Army War College in Carlisle, PA.

"Col. Gonder's formidable background and experience in both the public and private sectors will be of great benefit to us as more government agencies are seeking energy saving solutions under ESPC ENABLE and other state and local programs. This will allow us to scale quickly our work on the GSA Schedule," said Dockser.

GreenGen currently has work under the ENABLE program with US Forest Service, GSA, Customs and Border Protection, and the Department of Defense (Air Force).

#### ABOUT GREEN GENERATION SOLUTIONS, LLC

Green Generation Solutions (GreenGen) is a global energy solutions provider that engineers and implements energy efficiency solutions to lower buildings' operating costs while improving sustainability. GreenGen offers a wide array of services, including: high efficiency lighting retrofits, HVAC optimization, building commissioning, building envelope assessments, procurement, CHP system development, "smart building" systems, and data analytics. GreenGen holds [Contract # GS-07F-143BA](#) under the GSA Schedule 84. [www.greengenerationsolutions.com](http://www.greengenerationsolutions.com)
