FOR IMMEDIATE RELEASE

Green Generation Solutions, LLC Announces Steven Puchek as Manager, Solutions

Green Generation Solutions, LLC is pleased to announce that Steven Puchek has joined the firm as Manager, Solutions. Steve has over seven years of industry experience in project management and optimization of energy systems. As a Manager in the Solutions Group, Steve performs facility audits, conducts financial analysis, and assists in the design and optimization of energy saving solutions on behalf of Green Generation Solutions' clients.

"We are very pleased to have Steve join our team as Manager, Solutions. Steve's experience as an electrical engineer combined with his project management experience will immediately strengthen our Solutions Group, making us faster and better," said Brad Dockser, CEO.

Prior to joining GreenGen, Steve spent four years as a project lead analyst for EMSolutions, a government contractor, where he provided project management, modeling/simulation design and technical analysis for acquisition support. Steve was also a tenured electrical engineer at James Posey Associates, Inc., a Baltimore MEP building systems consulting firm. In that time, he designed and coordinated electrical, lighting, emergency, and telecom distribution systems and optimized building energy systems for numerous LEED-accredited projects.

Steve is a licensed Professional Engineer in the State of Maryland and previously held a Lighting Certification from the NCQLP. He attended The Pennsylvania State University where he received Bachelor and Master degrees, both in Architectural Engineering with a focus on electrical and lighting. He later attended the University of Maryland's Robert H. Smith School of Business, where he earned both a Master of Business Administration and a Master of Science in Finance.

ABOUT GREEN GENERATION SOLUTIONS, LLC

Green Generation Solutions is an established, growing building performance company that engineers and implements customized energy solutions aimed to improve the profitability of our client's facilities and their operations throughout North and South America and the United Kingdom. We believe that every business can be more profitable by making energy decisions backed by comprehensive analysis, collaborative planning, and ongoing measurement of results. At GreenGen, we offer a wide array of services, including: high efficiency lighting retrofits, HVAC optimization, building commissioning, building envelope assessments, procurement, CHP system development, "smart building" systems, and data analytics.
