## FOR IMMEDIATE RELEASE

### **Green Generation Solutions, LLC Announces Mark Foster as Manager, Europe and Unveils Website 2.0**

Green Generation Solutions, LLC (GreenGen) is pleased to announce that Mark Foster has joined the firm as Manager, Europe. Mark has over 15 years of industry experience in project management and optimization of energy systems. As Manager, Europe in the Solutions Group, Mark supports GreenGen's European operations, providing a full range of bespoke energy, water, and carbon reduction solutions for GreenGen's commercial property owner clients in Europe.

"Mark is a brilliant addition to our staff in Europe. He brings a wealth of experience as an electrical engineer that will immediately strengthen our Solutions Group. His deep experience in hospitality coupled with his background in implementing energy efficiency projects will be tremendously valuable in assisting our clients with meeting their energy efficiency goals," said Brad Dockser, CEO.

Mark brings over 15 years of engineering, project management, and construction experience with a dedication to sustainable practices and environmental stewardship. Specializing in hospitality and high-occupancy buildings, he leads interdisciplinary teams of engineers and contractors from initial building assessment to ongoing performance monitoring. Mark works to ensure minimal impact to occupant comfort and building operations regardless of the scale or complexity of the effort.

Prior to joining GreenGen, Mark was Vice President of Onsite Solutions at SOL VISTA, where he provided energy assessment, retrocommissioning, and owner's rep construction management services to the owners of upscale hotels, including InterContinental, Starwood Westin, Hyatt, Hilton, Kimpton, Viceroy, and W, as well as select service and extended stay assets. He also co-founded a residential property development firm and served as the VP of Operations for Impact Construction & Consulting.

Mark received a Bachelor of Science in Electrical Engineering from the University of Virginia with a minor in Computer Science. He began his career developing enterprise software systems and data-driven web applications with clients ranging from dot com start-ups to large commercial, non-profit, and government organizations such as Gannett, AARP, and the State of Maryland.

GreenGen is also pleased to announce the launch of its newly redesigned website. The URL remains the same ([www.greengenerationsolutions.com](http://www.greengenerationsolutions.com)), and the site is designed to reflect GreenGen's commitment to its expansion into Europe to reach a broader audience and attract potential companies seeking to lower operating costs through innovative energy efficiency solutions.

"We are very excited about our new website and the benefits it will offer to both existing and prospective clients," said Brad Dockser. "The redesigned website provides a more comprehensive view of our expanded service offerings, as well as clarity into our past project performance with additional project reports."

With the completion of the rebuild, GreenGen has added new and enhanced content, including a featured area on the home page for up-to-date projects and news items. The website has also been developed to feature a responsive design, adapting its display for optimal viewing on any size/resolution screen, including mobile devices.

GreenGen has significantly modernized its site to accommodate a growing customer-base, expanding as the company continues to branch out into new areas with its ongoing development in the United States, as well as in Europe.
